## SLIMMING

### PRICELIST

#### FAT FREEZE

*The procedure freezes and eliminates fat cells in the part of your body that does not respond to exercise & diet. Within a few weeks of treatment, your body breaks down these dead fat cells and flushes them out.*

*Treatment per area can be done every 4-6 weeks*

Application x 1	R700
Application x 2	R1300
Application x 4	R2400
Application x 6	R3600

#### CAVITATION & RADIO FREQUENCY

*Ultrasonic or ultrasound cavitation is the use of ultrasound technology to break down fat cells below the skin. It is a non-surgical method of reducing deep-seated cellulite and localized fat.*

*Sessions consist of both applications and can be done every 2-3 days*

45min x1 Session	R500
45 min x4 Sessions	R1800
45 min x8 Sessions	R3200

#### LIPO LASER

*Laser Lipo is one of the options for the removal of body fat. Heat from the laser causes the fat to soften, resulting in smoother and flatter surfaces.*

*The body's immune system gradually removes the liquefied fat from the treated area.*

*Sessions can be done every 2-3 days*

40min x1 Session	R600
40 min x4 Sessions	R2000
40 min x8 Sessions	R3200
